

Case Study #3 – Foodie-Fi

Based off the 8 sample customers provided in the sample from the subscriptions table, write a brief description about each customer's onboarding journey.

Try to keep it as short as possible - you may also want to run some sort of join to make your explanations a bit easier!

Based on the 8 sample customers, we see that every customer, but one went from a trial to a different plan after 7 days. We also see that most of these customers are still subscribed to the service with only one that canceled after a month. We also find that the pro monthly is the most popular plan with the customers based on this sample, with basic monthly being the second and pro annual following after.
